Title

PEAK ELEMENT FINDER

Description

Description: You are given an N- dimensional array arr[]. A peak element in the array is defined as an element whose value is greater than or equal to its neighboring elements (if they exist). Your task is to find the index of any peak element in the given array

Note: use 0-based indexing

Input:

An integer representing the number of elements in the array. N space-separated integers, denoting the elements of the array.

38R23EC138 3R22EC138 3R2

3BR23EC1383BR23EC1383BR23EC1383BR23EC138

34C138 38R23EC138 38R2

N space-separated integers ,denoting the elements of the array arr[]

30

Sample Input:

5

1 3 20 4 1

Sample Output:

2
